

Dear parents , this week we will be covering the following :

Year 5

We will be starting a new unit this week “ The way we see things “ . we will talk about how we see things , talk more about the sense of sight , how does our eyes work and the importance of light in this process.

We will also get in to the details of light as being a form of energy and start studying its properties and characteristics .

Kindly note that there will be a quiz covering the whole unit of “ flowering plant life cycle “ next Thursday 21/11/2019 .

Year 6

We will finish “ different types of mixtures and different methods of their separation” and will start a new unit “food chains “ . We will be talking in this unit about different classification of living organism according to their level of organization in the feeding process. We will define and explain what is a producer , a consumer and how they are related to form a food web and a food chain.

Kindly note that we will be having a quiz next Thursday 21/11/2019 (6A) and next Sunday 24/11/2019 (6B) in the following units : 1. Materials and their properties 2. Separation of mixtures
